

Floral Park-Bellerose SD Response to Coronavirus

Testing & Contact Tracing

Floral Park-Bellerose School District and all Nassau County School Districts have a long-standing relationship with the Nassau County Department of Health in response to communicable diseases. That relationship has been further developed and enhanced as we responded to COVID-19. Having been one of the hardest hit Counties in the State and Nation many lessons were learned. This has led us to develop many of the strategies noted in this guidance. This document will be incorporated into the Floral Park-Bellerose SD Re-opening Plan to help address requirements for COVID-19 Testing and Contact Tracing. This is a living document that will be revised as needed to incorporate new information as provided through Federal, State, and Local authorities.

1. COVID-19 Safety Co-Coordinators

Floral Park-Bellerose School District has designated in our Re-opening Plan COVID-19 Safety Co-coordinators Dr. Juli Mulcahy and Nora Epstein RN. These individuals will be responsible for answering questions from students, faculty, staff, and parents or legal guardians of students regarding the COVID-19 Re-opening Plan and its implementation. The COVID-19 Safety Co-coordinators will also work closely with the Nassau County Department of Health and other schools to monitor public health conditions and jointly develop monitoring strategies. These individuals will also be critical, along with our school nurses and school district physician, in assisting the Nassau County Department of Health with contact tracing efforts.

2. Training

The Nassau County Department of Health recommends that the COVID-19 Safety Co-coordinators and other school officials be trained in the basics of COVID-19 and contact tracing and suggests the course offered by Johns Hopkins University at: <https://www.coursera.org/learn/covid-19-contact-tracing?edocomorp=covid-19-contact-tracing>. Floral Park-Bellerose School District will require COVID-19 Safety Co-coordinators to complete this program.

3. Screening & Response Actions

The North Carolina Department of Health and Human Services has developed a ***Reference Guide for Suspected, Presumptive, or Confirmed Cases of COVID-19 (K-12) which can be found at <https://www.nc.gov/covid19#education>***. This document provides specific response actions guidance which may be considered in Plan development and includes a Screening Flow Chart, Staff Roles Flow Chart and Positive Screening Protocols Checklist. This is one of the numerous resources we considered in the development of our Plan.

Screening Flow Chart for COVID-19

NO FLAGS	EXPOSURE (No Symptoms)	DIAGNOSIS (No Symptoms)	AT LEAST ONE SYMPTOM (Fever, Difficulty Breathing, Loss of Taste or Smell, Headache, Vomiting, Diarrhea)
PROCEED TO SCHOOL	CANNOT GO TO SCHOOL	CANNOT GO TO SCHOOL	CANNOT GO TO SCHOOL
	Home for 14 days since exposure.	Home for 10 days since first positive COVID-19 test.	<p>If confirmed positive COVID-19 OR person has not been tested: 10 days since first symptoms, no fever of 100.0 F and above for 24 hours (without the use of fever reducing medications) AND symptoms improvement can return to school.</p> <p>If negative COVID-19 test: No fever of 100.0 F and above for 24 hours (without the use of fever reducing medication) AND symptoms improvement can return to school.</p> <p>If confirmed case other than COVID-19: Follow normal school policies to return to school.</p>

4. Communication

The Nassau County Department of Health has a designated phone number for all clinical questions from school nurses and school physicians. General questions from the public will be referred to the New York State Coronavirus Hotline at 888-364-3065 or the Nassau County Department of Health COVID Hotline at 516-227-9570.

Updates on Coronavirus in Nassau County can be received by texting COVID19NC to 888777 or by going to the Nassau County Website at <https://www.nassaucountyny.gov>.

5. Testing & Contact Tracing

The Nassau County Department of Health receives all confirmed cases of COVID-19 in Nassau County residents that are electronically transmitted from laboratories, by law. This does not include rapid tests (done at points of cares such as Urgent Cares) for which reliability and validity tests are still ongoing and are not automatically reported to Nassau County Department of Health, at this time. Confirmed cases in faculty, staff and administrators that live outside of Nassau County will be investigated by the jurisdiction that they reside in. In these cases, close communication will need to occur between the health departments of other jurisdictions, Nassau County and the school district. Once the health department conducts its investigation, the school nurse or COVID-19 Safety Co-coordinators will be called and notified. Depending on the specifics of the case and potential exposures, additional close contacts will be elicited, and quarantine and/or notification may be determined. Very often, these determinations are made in partnership with the health department. It is recognized that we can always be more restrictive than county health department recommendations.

6. How The New York State Contact Tracing Program Works (From NYS DOH)

If you test positive, a COVID Contact Tracer will connect you with the support and resources you may need through quarantine, such as help getting groceries or household supplies, child-care, medical care or supplies. The Tracer will work with you to identify and reach out via phone and text to anyone you've been in contact with while you were infectious to trace and contain the spread of the virus.

People who have come in close contact with someone who is positive are asked to stay home and limit their contact with others. By staying home during this time If you become sick yourself, you have not infected many others along the way. This is how we stop the spread!

Testing, medical and quarantine support for yourself and your loved ones will be arranged. We will not release your name to anyone. Your information is strictly confidential and will be treated as a private medical record.

This nation-leading program will place emphasis on areas with the highest rates of infection and on regions ready to open. The program will operate through the next flu season. It will be implemented in coordination with New Jersey and Connecticut.

Your caller ID will say **“NYS Contact Tracing” (518-387-9993)**.

Please answer the phone so we can keep NY moving forward and stop the spread of COVID-19.

7. Testing Responsibility

In cooperation with the School District Physician, School Nurses, and the COVID-19 Safety Co-coordinators, individuals exhibiting symptoms of Coronavirus will be referred to their personal physician for determination of appropriate treatment and the need to be tested. Current testing sites available in Nassau County and throughout New York State can be accessed by going to <https://coronavirus.health.ny.gov/find-test-site-near-you>.

8. Test Results

Suspected staff as well as students who have been tested for COVID-19 or who have signs and symptoms of COVID-19, should remain at home and not come to school until results are known. Any close contacts of a pending case's results should also remain at home and isolated until the results of the test are known. A positive result will require additional isolation of the case and close contacts elicited as described above. Quarantine and/or notification will be determined by the health department in conjunction with the school district. Laboratory testing may take days until results are determined. The Nassau County Department of Health has no control over laboratory testing.

9. Positive Cases & Contact Tracing

Often, a staff member or student (parent) may know the results of a COVID-19 test before the health department. In this situation, **the COVID-19 Safety Co-coordinators will report the case to the designated number.** The Nassau County Department of Health will attempt to confirm the case. **If it is confirmed**, then additional close contacts may be elicited depending on the specifics of the environment, case and potential exposures. **If the case is not able to be confirmed**, (often due to laboratory or electronic delays), then we may make our own determination regarding close contacts and potential exposure and exclusions at that time until further information is known. **The health department is available to the COVID-19 Safety Co-coordinators, if additional consultation is needed.**

10. Close Contact

According to the CDC, a close contact is defined as:

- a) within 6 feet of a positive case for more than 10-15 minutes for 48 hours before case's symptom onset to case's isolation;
- b) exposed to or give care to positive case;
- c) direct touching;
- d) shared food;
- e) exposed to sneezing or coughing or talking.

Close contacts are required to be quarantined according to NYS Department of Health and are monitored by Nassau County and NYS contact tracing efforts. We will notify other students and staff in the classroom or building who are close contacts.

11. Confidential Information

The Nassau County Department of Health will only discuss names of cases with appropriate school personnel consistent with HIPAA. No parents or other students will be informed of names or identifying information. We will never email names of individuals in recognition of the fact that email is not secure.
